H2311 The comfortable tasty framed cottage: an African American architectural iconography.
Article in English by Barbara Burlison Mooney; illus, photos, plans, refs.
Arising out of aspirations of assimilation before and after emancipation, the image of an idealized African American middle-class house was understood not only as a healthful and convenient shelter, but as the measure of racial progress and as a strategy for gaining acceptance into the dominant white culture. While the origins, development, and promulgation of the idealized image can be outlined with some assurance, judging its ultimate alure is more uncertain, and some have denounced the African American iconography of domestic architecture as a false and destructive adaptation of white hegemonic cultural values.

Housing: preservation, restoration: Israel: Jerusalem: Old City

H2508 Community involvement in a housing renewal project in the Old City of Jerusalem.
Article in English by Eman Assi; photos, plans, refs.
Housing renewal is a means of preserving buildings of architectural and historic significance as well as a process for returning property to a useful state. This paper documents the experience of the technical office of the Old City of Jerusalem Revitalization Program in rehabilitation and housing renewal. Two historically important residential buildings - Hosh Nseibeh and Hosh Jaber - are used as case studies illustrating the challenges and problems faced in the rehabilitation process. The paper concludes that in a project that requires community involvement, one should not only identify goals and objectives, but also analyze the techniques that are available and the resources they require. The main source of user satisfaction is not so much the degree to which the needs of the clients have been met, but rather their feeling of having influenced the final outcome.

I0141 A wallpaper discovery at Barlaston Hall.
Article in English by Sophie Andreae; illus, photos, plans, ports, refs.
Identification of a scrap of wallpaper from the opening between the staircase hall and the Saloon as being contemporary with the building of the house (1756, architect Sir Robert Taylor) indicates that the Saloon was probably a riot of colour. It had been thought that in the 18th century wallpaper was not associated with principal reception rooms, but the discovery at Barlaston suggests that highly coloured floral designs were at one point considered appropriate for a principal room.

Interior decoration: preservation, restoration: Great Britain: Cambridge (Cambridgeshire): Fitzwilliam Museum: Entrance Hall

I0145 The entrance hall of the Fitzwilliam Museum, Cambridge: a conservation approach to nineteenth-century architectural polychromy.
Article in English by Tobit Curteis; illus, photos, refs.
The building was designed by George Basevi who died before the entrance hall was constructed. C R Cockerell was engaged to complete the building, however his designs for the entrance hall were not carried out as the costs for completion were too high. In 1870 when further funds were available, E M Barry was commissioned to design the hall and decorations which were completed in 1875. Following detailed studies in 1998, the Entrance Hall decoration was found to be almost entirely original although covered by dirt. The article describes the analysis and treatment of the decorative scheme in the cleaning and conservation carried out between 1998 and 2001.

Israeli architecture

I0209 Israelis in Berlin censorship row.
Article in English by Zoe Blackler.
The association representing architects in Israel is facing accusations of censorship after it blocked a controversial exhibition planned for the UIA conference in Berlin. Eyal Weizman and Rafi Segal had been commissioned by the Israel Association of United Architects to prepare the national submission. The architects prepared an exhibition and catalogue examining the resettlement of the Israeli territories over the past 20 years, the layout of the settlements and the forces and processes that brought them about. Their association feels that 'as the official exhibition of Israeli architects it must be balanced' - and isn't.

L0251 Locating the georgic: from the 'ferme ornee' to the model farm.
Article in English by Laura B Sayre; illus, photos, refs.
The term was coined by Stephen Switzer around 1729. '.. although definitions of the ferme ornee shift slightly over the course of the long eighteenth century, some version of the form is to be found at every significant stage in the development of the quintessentially 'English' landscape garden, as that story is typically told. This coincidence suggests two additional points: first, the extraordinary persistence in the georgic impulse to combine profit and pleasure in designed landscapes; and second, the surprising fertility of that combination for the discovery of new understandings of the countryside.'.

L0310 Special issue. Tierra usada [Used land].
Article in English, Spanish, diagrs, details, elevns, illus, photos, plans, refs, sketches, secns.
The issue sets out to ausculate certain places, some of them landscapes of spoliation or catastrophe, others landscapes of regeneration. Some of the places ausculated are environments which have been subjected to a specific, easily identified activity, to a use or an irruption which has left a deep, recognisable imprint, whether associated with industrial production, military infrastructure, the film or simulacrum industry, refuse dumping or continual visits. Used Land ultimately examines the possibility of drawing temporary maps which constitute a possible biography for a site. Projects illustrated include: CargoLifter hangar, Brand, Germany (SIAT Architektur & Technik), p. 106-109; Waldpark, Potsdam, Germany (Bureau B & B), p. 110-113; Lighthouse, Torredembarra, Tarragona, Spain (Josep Llinas Carmona), p. 114-115; Fontsanta dry riverbed, San Joan Despi, Barcelona, Spain, (Manuel Ruisanchez), p. 116-119; Canyado dry riverbed, Badalona, Barcelona, Spain (M Isabel Bennasar Felix), p. 120-125; Athletics track, Olot, Girona, Spain (RCR Arquitectes), p. 126-131; Reclaiming the embankments of the river Gallego, Zuera, Zaragoza, Spain (Inaki Alday and others), p. 132-141; Altamira, museum and research centre (Juan Navarro Baldeweg), by Amanda Schachter, p. 142-153; Extension to Nederlands Openluchtmuseum, Arnhem (Mecanoo), p. 154-161; Nelson Mandela Museum at Umtata, Qunu and Mvezo, South Africa (Nina Cohen and Hilton Judin), p. 162-167; Boathouse for Alvar Aalto's boat, Nemo Propheta in Patria, Muuratsalo, Finland (Claudia Schulz and Anne-Mette Krolmark), p. 168-169; Community centres in Urubo, Bolivia and Marcovia, Honduras (Jae Cha), p. 172-175; The Litoral Central, Venezuela - projects for the coastal strip devastated in December 1999 by torrential landslides, p. 176-183.

L0317 On the notion of architectural hybridisation in Latin America.
Article in English by Felipe Hernandez; photos, refs.
This paper seeks to demonstrate that the notion of hybridisation has been thoroughly mistaken within recent architectural debates in Latin America. This is mainly due to the fact that theorists have limited themselves largely to an architectural field, and have failed to engage sufficiently with a broader range of cultural issues.

L0342 'In the face of the court ...': law, commerce, and the transformation of public space in Boston, 1650-1770.
Article in English by Martha J McNamara; illus, photos, plans, refs.
As the Massachusetts legal community gained coherence as a profession in the mid-18th century, lawyers looked to distance themselves from commercial activities and to establish an exclusive venue for court proceedings. Courthouses constructed throughout the state in the late 18th century legitimized that emerging legal profession and allowed for such a separation.

L0529 Historic lighting - saint or sinner?.
Article in English by Gersil Kay; illus, photos, tables.
Although light is essential to see, along with unfavourable temperature and humidity levels, it is one of the most destructuve elements for cultural heritage. Introducing electric light into older buildings, where it was never used originally, often presents a problem. The maintenance, repair, upgrading or new installation of any modern mechanical or electrical system, if not done competently and with sensitivity, may cause horrendous cost overruns, untold aggravation or even irreversible damage to original design and fabric. Now there is a lighting tool - to be employed either in combination with traditional products or, where it can do a better job, on its own - with long sought-after features of safety, ease of use; economy of installation, operation and energy; unobtrusiveness and longevity. It is glass-fibre-optics. With tables of definitions (p. 40) and some applications for end-emitting glass-fibre-optic lighting (p. 46).

M0800 Whitby's new Endeavour.
Article in English by Mary Miers; photos, ports.
The Captain Cook Memorial Museum brings to life the naval 'nursery' that nurtured one of the world's most famous explorers. It is located in the house of the shipowner, Captain John Walker, to whom Cook was apprenticed. When the museum was created in the 1980s the work of restoring and converting the 17th century house was overseen by the architect Francis Johnson, while recent work has been under the direction of Clive Sheridan.

M0850 The entrance hall of the Fitzwilliam Museum, Cambridge: a conservation approach to nineteenth-century architectural polychromy.
Article in English by Tobit Curteis; illus, photos, refs.
The building was designed by George Basevi who died before the entrance hall was constructed. C R Cockerell was engaged to complete the building, however his designs for the entrance hall were not carried out as the costs for completion were too high. In 1870 when further funds were available, E M Barry was commissioned to design the hall and decorations which were completed in 1875. Following detailed studies in 1998, the Entrance Hall decoration was found to be almost entirely original although covered by dirt. The article describes the analysis and treatment of the decorative scheme in the cleaning and conservation carried out between 1998 and 2001.

M0905 The Royal Horticultural Society bandstand mystery - or, What happened to the first cast-iron bandstands?.
Article in English by Hazel Conway; illus, refs.
The cast iron band houses designed by Capt. Francis Fowke for the Royal Horticultural Society Gardens in South Kensington in 1861 were the first examples of what later became known as bandstands, of cast iron, to be erected in Britain. The bandstands were relocated after the RHS left the Kensington Gore site in 1888 and for many years it was thought that one had been re-erected on Clapham Common, but the author has discovered that it was re-erected in Southwark Park. It had been removed by 1968 but in the current restoration of the park it is being reconstructed using the original detailed drawings.

O0441 Imposed floor loading for offices: a re-appraisal.
Article in English by Stuart J Alexander; diagrs, graphs, refs, tables.
The reappraisal of office floor loading has first required a statistical definition of characteristic loading. The provision of the British code BS 6399-1 and Eurocode EN 1991-1-1 are examined, together with those of five non-European-language codes. The considerable variation and inconsistency gives cause for concern and an opportunity for rationalisation.

O0565 Palladio's canonical Corinthian entablature and the archaeological surveys in the Fourth Book of 'I quattro libri dell'architettura'.
Article in English by Branko Mitrovic; refs, tables.
'The implication is that by the 1570s a Venetian architect publishing a version of the canon of the five orders was neither expected to copy it directly from ancient monuments nor to derive it from Vitruvius. Instead, it was important to show that he had sufficient expertise in Roman archaeology to demonstrate the necessary competence to formulate the canon himself.'.

P0003 Lawrence Alma-Tadema and the modern city of ancient Rome.
Article in English by Elizabeth Prettejohn; illus, refs.
'This paper argues that Alma-Tadema's representations of the ancient city of Rome can be seen as significant explorations of urban experience, parallel to the more familiar nineteenth-century representations of modern Paris. Alma-Tadema distinguishes clearly between the small town environment of Pompeiian subjects and the metropolitan environment of pictures set in the capital. The late nineteenth-century notion of the city's modernity thus provides a novel perspective on traditional fascination with Rome as the ultimate paradigm for the urban.'.

P0030 A reconstruction of Thomas Wolsey's Great Hall at Hampton Court Palace.
Article in English by Jonathan Foyle; diagrs, illus, photos, plans, refs, tables.
'It is now clear that Thomas Wolsey built a Great Hall at Hampton Court from 1515-c. 1521. Through a metrological analysis, the form of this building is re-established, and its relationship with the masonry of attributed buildings suggests William Vertue as its designer. Wolsey can now be credited for redefining the Great Hall as the first room in a sequence of elevated state apartments. A new understanding of the Great Hall's formal relationship with the Great Chamber has introduced a possible early example of the piano nobile in England as a context for Wolsey's Italianate decoration.'.

Article in English by C E B Brett; elevns, illus, photos, plans.
By far the most Romantic house by an English architect on foreign soil is the neo-Jacobean and Moorish-style Alupka, on the Black Sea coast, a surprising design to come from an architect who was also involved in Buckingham Palace (Edward Blore). The palace was begun in 1828 to designs attributed to Thomas Harrison of Chester but he died in 1829 and work stopped. The owner, Count Vorontsov then consulted Blore and by 1832 Blore had made hundreds of drawings for the building.

P0358 Locating the georgic: from the 'ferme ornee' to the model farm.
Article in English by Laura B Sayre; illus, photos, refs.
The term was coined by Stephen Switzer around 1729. '.. although definitions of the ferme ornee shift slightly over the course of the long eighteenth century, some version of the form is to be found at every significant stage in the development of the quintessentially 'English' landscape garden, as that story is typically told. This coincidence suggests two additional points: first, the extraordinary persistence in the georgic impulse to combine profit and pleasure in designed landscapes; and second, the surprising fertility of that combination for the discovery of new understandings of the countryside.'.

P0598 'A ruin amidst ruins' - the Jamestown Church Tower.
Article in English by Gwendolyn White; illus, photos, refs.
'A search for the meaning of the past is suggested by the images of Jamestown. These words could also be used to describe the motivations of the founders of the APVA [Association for the Preservation of Virginia Antiquities]. By romanticising the past they might be able to regain what they felt had been lost in the Civil War. It was not architecture itself that the APVA was interested in, but the symbolic representation of Virginia's place as first among the English colonies in America and the importance they endowed it with.'.

Renaissance architecture
R0249 A Palladian palinode: reassessing Rudolf Wittkower's 'Architectural principles in the age of humanism'.
Article in German by Branko Mitrovic; refs, tables.
'Renaissance architects were concerned with visuality. The reconstruction of the beliefs they had about proportions, stories they told their clients or views they expressed in order to present themselves as humanists and intellectuals, is simply not enough to explain their design procedures or the visual, three-dimensional reality of the buildings they designed.'.

This article shows that Cosmo Alexander inherited the busts of James Gibbs and Alexander Pope from Gibbs in 1754 and that the busts remained together until being sold in 1783. Their common history established that Gibbs commissioned them on his own account from Rysbrack and that he kept them in his home at 5 Henrietta Street, London, until his death. Gibbs emerges as one of Rysbrack's earliest and most devoted patrons.
